

António Cardoso
(XpectralTEK)

"How to understand art using XpeCAM: a practical approach"

The lecture will take place on **June 16th 2021 (Wednesday) at 6.30 pm (CET)** on Zoom.

Expected duration: 90 minutes (introduction + lecture + Q&A)

Language: English

Moderator: Maja Sučević Miklin

Join the Zoom meeting via this link:
<https://us02web.zoom.us/j/81592663796>

The lecture will be recorded and the recording will be posted on the Croatian Conservation-Restoration Association YouTube channel.

Lecture summary

Considering the novel developments in spectral imaging applied to art conservation and the attempt to know better a work of art, XpeCAM Solution will solve these needs to understand, in a more profound way, a specific piece of history that we may have in front of our eyes, bringing a deep impact on the way we perceive the world around us.

Lecturer's short biography

António Cardoso has a master's degree in conservation-restoration from the Polytechnic Institute of Tomar (Portugal). He also has an MBA in marketing. He became a member of the International Institute for Conservation of Historic and Artistic Works (IIC) in 1997. Since 2001 he has been a CEO of Signinum – Gestão de Património Cultural in Portugal. He is the cofounder of XpectralTEK (2015). His work deals with research and development of new products and applications that can help art conservators to be more efficient and productive in their daily work.
